Disaster Medical Management: Altered Standards of Care and Alternate Care Sites

Wednesday, November 7, 2007

10:00 am - 2:00 pm

C. J. Callaway's

500 E. 69th Street

Sioux Falls, SD

Course Description:

An overview of recommended systems and processes for planning and implementing the allocation of scarce hospital and acute care resources during a mass casualty event. Discussion of issues and surrounding non-federal, non-hospital based alternative care sites and the decisions that will need to be made regarding these sites during a mass casualty event.

Learning Objectives:

At the conclusion of this continuing medical education event, participants should be able to:

1. Discuss the concept of "Altered Standards of Care" and how this applies to disaster response

2. List several situations where traditional standards of care may require adjustment in a mass care event
3. Describe what is meant by an "Alternate Care Site" and how this would augment medical surge capacity
4. List examples of alternate care sites in your community

Target Audience:

Bioterrorism Coordinators, Hospital Administrators, Physician Leadership, Regional Chairpersons, Pandemic Influenza Planning Group, SDAHO, and Aberdeen Area Indian Health Services

Presenter:

Stephen V. Cantrill, MD, FACEP

Dr. Cantrill is currently the Project Director and Principal Investigator of the BNICE Colorado WMD Training Center at Denver Health Medical Center and Associate Professor in the Division of Emergency Medicine at the University of Colorado Health Sciences Center. Until recently he served as the Associate Director of Emergency Medicine at Denver Health. He has lectured nationally and internationally on many topics including weapons of mass destruction, disasters and disaster management and has been involved in disaster education for more than two decades. He served as the regional medical coordinator for Denver's participation in Operation TopOff 2000. He has also been involved in weapons of mass destruction training for Colorado and has participated in the planning for multiple mass gathering events, including the Denver Papal visit and the Denver Summit of Eight world economic conference. He has testified at US Senate Committee hearings on bioterrorism preparedness. He has recently served as the principal investigator on an Agency for Healthcare Research and Quality(AHRQ) regional surge capacity grant and is currently the principal investigator of the AHRQ HAvBED national bed availability project. Dr. Cantrill is board certified in the practice of emergency medicine.

Program Agenda:

9:30 am - 10:00 am Registration

10:00 am - 11:00 am Altered Standards of Care
